| <b>Programme operator:</b>      | EPD International AB  |
| <b>EPD registration number:</b> | S-P-04250 available from EPD International  |
| <b>Publication date:</b>        | 2021-11-02  |
| <b>Valid until:</b>             | 2026-10-28  |

An EPD should provide current information and may be updated if conditions change. The stated validity is therefore subject to the continued registration and publication at [www.environdec.com](http://www.environdec.com)

## General information

**Owner of the declaration and manufacturer:**

LIP Bygningsartikler A/S · Industrivej 16 · DK-5580 Nørre Aaby · Phone: +45 6442 1330 · Fax: +45 6442 3408

**Declaration issued:** 2021-11-02

**EPD Prepared by:** Bureau Veritas HSE, Denmark

**Standards:** ISO 14025 and EN 15804+A2:2019. EPD's of other construction products may not be comparable if they do not comply with this standard.

**Scope:** This LCA study is intended to be used in a cradle to grave with module D EPD covering the following primers in table 1, all produced by LIP Bygningsartikler A/S at the same production site. The EPD will be accessible on <http://www.lip.dk/> together with safety data sheets and product information, providing information for business-to-business communication. The Geographical scope is Europe.

## About LIP Bygningsartikler A/S

LIP Bygningsartikler A/S is a Danish Company, which since its founding in 1967 has produced high quality products at competitive prices.

The product range from the beginning was tile adhesive and sealants, which since then has been expanded with products within flooring putty, waterproofing, silicone, epoxy, filler compounds, etc.

All our products are continuously under internal as well as external quality control, so that we can always live up to our slogan:

LIP - when building on quality!

## Product information

### Products represented

LIP 2K Waterproofing adhesive, LIP vs 30 Waterproofing adhesive, LIP 54 Primer & LIP Supergrund.

Figure 1: Pictures of the four LIP products covered in this project report.

### Product description

These products are manufactured by LIP Bygningsartikler A/S in the production plants located in Nørre Aaby, Denmark. LIP 2K Waterproofing Adhesive is used for making up waterproofing paste for waterproofing floors and walls in damp rooms before covering the walls and floors with ceramic tiles or natural stones.

LIP VS 30 Waterproofing Membrane is a liquid which is used for waterproofing floors and walls in damp rooms before covering floors and walls with ceramic tiles or natural stones.

The Primer 54 and LIP Supergrund are liquids which are used for priming substrates before applying LIP floor compounds.

The manufacturing process starts from raw materials purchased from suppliers and stored in the plant. Bulk raw materials are stored in specific silos and added mostly automatically in the production mixer, according to the formula of the product. Other raw materials, supplied in bags or big bags, are stored in their warehouse and added automatically or manually in the mixer. The production is a discontinuous process, in which all the components are mechanically mixed in batches.

The semi-finished product is then packaged in plastic cans and film, put on wooden pallets, covered by stretched hoods and stored in the Finished Products' warehouse. The quality of final products is controlled before the sale.

The product is supplied from production in dry form, premixed in respect of all contents but water. Water is added for Lip 54 Primer and LIP Supergrund at the building site in the construction/ installation stage, in a defined amount and technique, in order to produce a deformable cementitious adhesive of high performance.

Table 1: Product information for the four products covered by this EPD.

| Product name                  |                                  | Article no.                    | Description                 |

| Lip 54 Primer  | LIP 54 Primer  | 10 litres: 3856614<br>2,5 litres: 3856606<br>1 litre: 90543 | 1, 2,5 and 10 litre containers |
| LIP Supergrund | LIP Supergrund | 12 kg: 80506<br>3 kg: 80513<br>1 kg: 80520                  | 1, 3 and 12 kg buckets         |

**Declared Unit**

Declared unit is 1 kg of finished product according to the PCR 2019-14 PCR Construction products v1.11.

The product consumption, of course, depends on the size of the tile, unevenness, grout size and the size of the toothpick.

**Reference service life**

According to LIP Bygningsartikler A/S experience, the Reference Service Life (RSL) of premade primers has been known to be 50 years or longer.

**Technical data**

The LIP 2K Waterproofing and LIP vs 30 Waterproofing adhesive products are designed, produced and classified in table 2 according to Guideline for European Technical Approval (ETAG) No. 022 Watertight covering kits for wet room floor and/or walls, Part 1 Liquid applied coverings with or without wearing surface. LIP 54 Primer and LIP Supergrund are not CE marked.

Table 2: Performance information for the four products according to EN 12004:2007+A1:2012.

|                                     | LIP 2K Waterproofing | LIP vs 30 Waterproofing adhesive | Lip 54 Primer | LIP Supergrund |

| Resistance to temperature           | ≥ 0.5 MPa            | ≥ 0.5 MPa                        | N/A           | N/A            |
| Resistance to water                 | ≥ 0.5 MPa            | ≥ 0.5 MPa                        | N/A           | N/A            |

**Air emission**

All the four Primers covered in this EPD has low dust technology and very low emission of volatile organic compounds and documented with GEV-EMICODE EC 1<sup>PLUS</sup>. Documentation attached for GEV-EMICODE.

**Content declaration**

Content declaration including packaging covering the four LIP Primers in this EPD.

Table 3: Content declaration, which covers the four LIP products.

| LIP Primers         |         |                      |                                  |                              |
|---------------------|---------|----------------------|----------------------------------|------------------------------|

| Packaging materials |         | Weight, kg           | Weight-% (versus the product)    |                              |
| Jerry cans          | Plastic | 26 – 72 g/kg product | 2,6 - 7.2 %                      |                              |
| Bucket              | Metal   | 0 - 7.6 g/kg product | 0,0 - 0.076 %                    |                              |
| Transport packaging | PE-film | 0.6 g/kg product     | 0.06 %                           |                              |
| Total:              |         |                      | <8.0%                            |                              |

During the life cycle of the product no hazardous substance listed in the “Candidate List of Substances of Very High Concern (SVHC) for authorization” has been used in a percentage higher than 0.1% of the weight of the product.

## LCA information

### Product category rules (PCR)

PCR 2019:14 Construction products (EN 15804:A2) Version 1.11.

### Time representativeness

Data from factory (primary data) is from 2020 and 2021.

### Database(s) and LCA software used

LCA Software: Simapro 9.1.0.7

Database: Ecoinvent 3.6 – allocation, cut-off by classification – unit.

The impact models used are the ones included in the Simapro method named EN 15804 + A2.

### Description of system boundaries

This study covers the cradle to grave with module D of PCR 2019-14 PCR Construction products v1.11.

Table 4: Life cycle stages covered by this LCA study.

|                      | Product stage  |  |               | Installation processes |                           | Use stage |             |        |             |               |                        |                       | End of life stage          |           |                  |          |                                    |

**Product stage (A1-A3):**

- A1-A2: extraction, supply and transport of raw materials and packaging to LIP Bygningsartikler A/S. Raw materials are purchased from European suppliers.
- A3: manufacturing process of product and its packaging and waste management from the same process. All the electricity comes from wind energy produced at Lindø Port with >3MW onshore wind turbines. Approximately 0.88MJ is used for the production of 1 kg product. A3 covers dosage and mixing of selected and measured raw materials and additives to ensure that the product meets desired properties and packaging material consumption. Packaging product materials consist of the bag material, wooden pallet and LDPE used as wrapping material. The wooden pallet is part of a return system, and therefore not a part of this study.

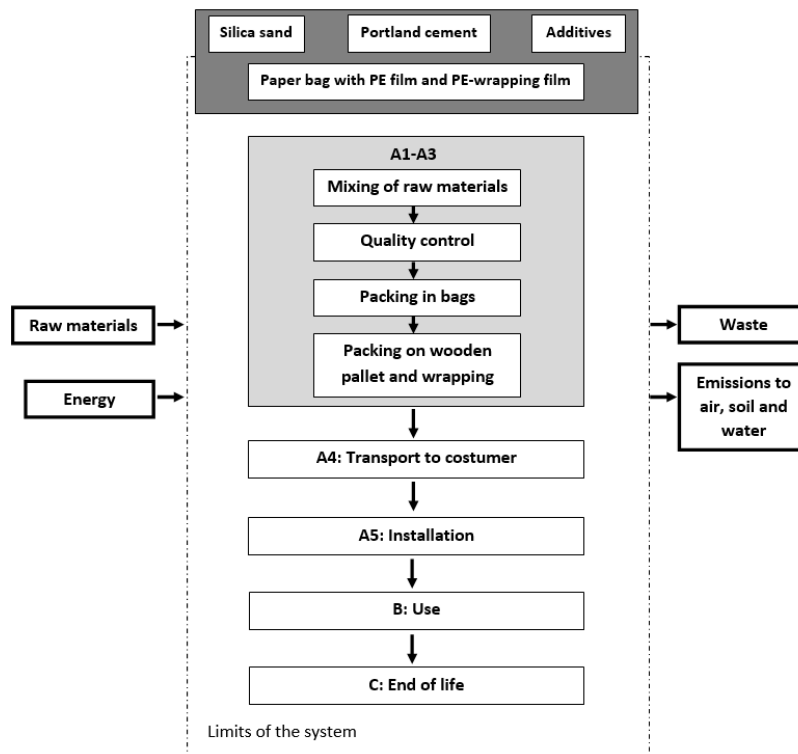

Figure 2: Limits of the system in this study.

#### Construction process stage (A4-A5):

- A4: distribution to typical Customer by transport of packaged product from production gate to end user (building site). The customers of LIP Bygningsartikler A/S are primarily from Denmark. About 92 percent of the products produced by LIP at the production site in Nørre Aaby in Denmark, are sold in Denmark, 4 percent in Sweden, 2 percent in Norway and 1 percent in both Germany and the Netherlands. The distance has in the present LCA study been estimated to be 500km via road transport by a Euro 6 lorry of 32 metric ton.
- A5: installation of product into building, including required water and its blending energy. For installation, water consumption can be found in table 1. Mixing electricity consumption is assumed to be 0.135 MJ/kg. This is equivalent to the use of a 1200-Watt handheld mixer for 3 minutes. We assume that there are no losses during installation. There is no sector specific standard for any losses or spillage. The product can be used in 12 months or 18 months. The electricity mix is modelled with European mix and it is considered as an adequate choice, but since more than 90% of the market is in Denmark, Danish residual mix would be a better choice to consider in this study's validity period of 5 years.

#### Use stage (B1-B7):

- B1 to B7 are not relevant (NR) as they are not applicable: the product does not need maintenance or replacement during its RSL. If professionally used and properly installed and according to LIP Bygningsartikler A/S experience, the Reference Service Life (RSL) of premade primers has been known to be 50 years or longer.

**End of life stage (C1-C4):**

- C1: deconstruction and demolition of the product into the building. Primers for surface use are typically not considered as part of the structure of the building. However, during the building destruction, the quantity of extra energy required to break this application can be neglected compared to the energy required to demolish the structure of the building and are therefore not included in this LCA study.
- C2: transport of waste product from demolition to recycling/disposal facility that is waste collection. The distance is assumed to be 50 km via road transport by a Euro 6 lorry of 32 metric ton.
- C3: The product is expected to be disposed as landfill after end of life.
- C4: Waste disposal including physical pre-treatment.

**D Reuse-Recovery-Recycling potential**

Module D calculates the potential environmental benefits of the recycling or reuse of materials. This product has not considerable benefits due to recycling or/and reuse.

**Environmental performance**

All the environmental impacts have been calculated in SimaPro and with the EN 15804 + A2 Method, which takes all the methods defined by the European Standard EN 15804 + A2 into account.

All the LCIA results are relative expressions and do not predict impacts on category endpoints, the exceeding of thresholds, safety margins or risks.

---

## LIP 2K Waterproofing adhesive

The estimated impact results are only relative statements, which do not indicate the endpoints of the impact categories, exceeding thresholds values, safety margins or risks.

### Core environmental impact indicators

Table 5: Core environmental impact results for the product LIP 2K Waterproofing adhesive

| Results per declared unit |   |           |          |          |   |    |          |    |          |   |

| Exported energy, electricity  | MJ   | 0     | 0  | 0        | 0 | 0  | 0  | 0  | 0  | 0 |
| Exported energy, thermal      | MJ   | 0     | 0  | 0        | 0 | 0  | 0  | 0  | 0  | 0 |

### Information on biogenic carbon content

Table 10: Biogenic Carbon - LIP 2K Waterproofing adhesive

|                                      | Unit | Quantity |
|--------------------------------------|------|----------|
| Biogenic carbon content in product   | kg C | <5%      |
| Biogenic carbon content in packaging | kg C | <5%      |

Results per functional or declared unit. Note: 1 kg biogenic carbon is equivalent to 44/12 kg CO<sub>2</sub>.

### LIP vs 30 Waterproofing adhesive

The estimated impact results are only relative statements which do not indicate the end points of the impact categories, exceeding thresholds values, safety margins or risks.

### Core environmental impact indicators

Table 11: Core environmental impact results for the product LIP vs 30 Waterproofing adhesive

**Information on biogenic carbon content**

Table 22: Biogenic Carbon - LIP 54 Primer

|  | Unit | Quantity |
|--|------|----------|
| <b>Biogenic carbon content in product</b>  | kg C | <5%      |
| <b>Biogenic carbon content in packaging</b>  | kg C | <5%      |
| Results per functional or declared unit. Note: 1 kg biogenic carbon is equivalent to 44/12 kg CO2. |      |          |

**LIP Supergrund**

The estimated impact results are only relative statements which do not indicate the end points of the impact categories, exceeding thresholds values, safety margins or risks.

**Core environmental impact indicators**

## Information on biogenic carbon content

Table 28: Biogenic Carbon - LIP Supergrund

|   | Unit | Quantity |
|---|------|----------|
| <b>Biogenic carbon content in product</b>   | kg C | <5%      |
| <b>Biogenic carbon content in packaging</b>   | kg C | <5%      |
| Results per functional or declared unit. Note: 1 kg biogenic carbon is equivalent to 44/12 kg CO <sub>2</sub> . |      |          |

## Additional information

### Fossil free energy:

LIP Bygningsartikler A/S has used fossil free energy since 2014. Today, the energy is delivered from the wind turbine power plant at LINDØ port of Odense from Energy Fyn. The total energy consumption on the site is equivalent to 919MWh per year.

## Information related to Sector EPD

This is an individual EPD.

## Differences versus previous versions

This is the first version of the EPD.

\*Disclaimer: This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

\*\*Disclaimer: The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experience with the indicator.
