The Cromology Group

The Cromology Group was founded in 2015, at the end of a decades-long transformation process that began in the late 1990s, when Lafarge Peintures created the Specialty Materials division that was later Materis Paints and quickly became a player on the global and emerging markets. Today, Cromology retains that pioneering spirit of its Dutch origins in the 1700s, confirming itself as a solid, worldwide group and a leader in Southern Europe, with a presence in 50 countries, and a global annual turnover of more than 600 mln/€. The group's strength is expressed through its 3700 employees including 100 researchers and highly specialised technicians - 9 production sites and 5 R&D laboratories.

Cromology's brands are marketed in over 50 countries worldwide, with a direct **presence in 8 countries.** In each market, Cromology's brands are an expression of its history, professionalism and capacity for innovation. **20% of the turnover is generated by new products.**

Cromology Italia believes in a multi-channel strategy diversified by brand, range of services and type of customer: from designers to professional applicators and private customers. With an offer of 7 **specialised brands, Cromology holds 7% of the Italian market,** an absolute leadership position.

With headquarters in Porcari, in the province of Lucca, the company counts on two state-of-the-art production sites of 80,000 square metres, a 45,000 square metre logistics hub and the cooperation throughout Italy of 400 collaborators, including head office staff and a sales network. With its own brand portfolio and a wide range of products and services, Cromology's aim is to be a trusted partner alongside customers, professionals and private individuals, in order to achieve professional excellence together.

CSR

Sustainability

The Cromology Group's approach to sustainability stems from its Mission: **to responsibly protect and colour homes to improve everyone's life.** Cromology places Corporate Social Responsibility (CSR) at the heart of its strategy, at the same level as profitable growth and operational excellence. Cromology integrates its CSR objectives into business development and new product launches. Cromology's CSR approach relates to the Sustainable Development Goals (SDGs) defined by the United Nations. Cromology has identified the 5 SDGs most relevant to its activities and on the basis of these is committed to responsible and sustainable development in order to maximise the value generated for customers, employees, shareholders, suppliers, civil society and local communities.

EPD programme	The International EPD® System - www.environdec.com					
EPD Programme operator	EPD International AB Box 210 60, SE-100 31 Stockholm, Sweden					
Product Category Rules (PCR)	International EPD System - PCR 2019:14 - "Construction products" - Version 1.11 EN 15804:2012+A2:2019 - "Sustainability of construction works - Environmental product declarations - Core rules for the product category of construction products."					
EPD Drafted by	Leyton Italia s.r.l					
Declaration holder	Dr. Marco Demi Cromology Italia S.p.A.					
Checked by	Guido Croce					
Geographical reference	International					
EPD registration number	S-P-05937					
Publication date	29/07/2022					
Expiry date	29/07/2027					
Product description	Ducotone Absolut super-washable masking filler wall paint					
Application scope	The LCA analysis was conducted according to the ISO 14025, ISO 14040, ISO 14044 and EN15804 standards. Both process-specific data and data from the Ecoinvent 3.6 database were used. The methods for calculating and assessing the impacts were used as defined in 2019 EN 15804 2012+A2:2019. The LCA study covers the production phases of raw materials and energy; transport of materials; production at the company's sites; and the end of life of the material.

Environmental Declaration

Sustainability

The abbreviation EPD stands for **Environmental Product Declaration** and is a document in which the environmental

performance of a product is described in the form of standardised and objective data. It makes it possible to analyse and quantify how much energy and natural resources are used by production and distribution processes, how much CO₂ is emitted into the atmosphere, what materials are used for packaging and how much waste is generated. In the field of construction, the **EPD is an essential basis for professionals** such as architects and designers when it comes to the overall planning and evaluation of interventions. As the validation of the EPD must be performed by recognised Certification Bodies, it represents an important act of transparency and accountability for the market. EPDs, created on a voluntary basis, must be prepared with reference to the **LCA (Life Cycle Assessment)** which is an analytical and systematic methodology that assesses the environmental significance of a product or service throughout its entire life cycle. LCA is the methodology that serves as the technical basis for a **wide range of possible actions aimed at increasing the sustainability of products**, as it helps to understand the impact generated towards the environment by products. The PCR (Product Category Rules) contain the rules for conducting the LCA, which must also comply with the international standard EN 15804 for construction products. This EPD refers to **Ducotone Absolut**.

The Ducotone Absolut product

Ducotone absolut

This Environmental Product Declaration EPD refers to Ducotone Absolut, a superwashable wall paint with very high coverage, opacity and high filling power. It is particularly suitable for softening and masking wall defects. Its exceptional filling power makes it ideal for concealing joints and grouting on plasterboard substrates. Ducotone Absolut offers a very high coverage capable of masking even a 98% black background with a single coat.

Environmental Declaration Process

DECLARED UNIT

For this EPD, in accordance with the reference standards, the concept of **"declared unit"** is used instead of "functional unit". The declared unit is the quantity of product required to produce 1 kg of finished product.

REFERENCE YEAR

The data used refer to the calendar year 2020. Study carried out in 2021.

SYSTEM BOUNDARIES

This EPD is of the "cradle to gate with options" type and includes forms A1 (Raw Materials), A2 (Transport), A3 (Production), C1 (Total/Partial Demolition), C2 (Landfill/Recovery Transport), C3 (Recovery/Reuse Process), C4 (Landfill) and D (Recovery/Reuse Potential).

Additional information

Additional information

GREEN PUBLIC PROCUREMENT (GPP)

GREEN PUBLIC PROCUREMENT (GPP)

Minimum Environmental Criteria (MEC) for Constructions. **Minimum Environmental Criteria (MEC) are issued by the Ministry of the Environment** and concern specific purchase categories. They provide "environmental considerations", linked to the different phases of tender procedures (subject of the contract, technical specifications, rewarding technical characteristics linked to the most economically advantageous tender, contract execution conditions) aimed at qualifying, from an environmental point of view, both supplies and procurements throughout the entire life cycle of the service/product.

THE PAINT PRODUCT COMPLIES WITH THE MEC BUILDING REGULATIONS IF IT MEETS THE TECHNICAL SPECIFICATIONS LISTED BELOW

1. EMISSION LIMITS

The manufacturer of Paints and Varnishes **must present documentation proving compliance with the emission limits indicated in the table,** verified by measuring the emissions of its products. This documentation will consist, for example, of a test report carried out by a third-party laboratory or, if the company has suitable instrumentation, in-house laboratory tests.

2.3 Technical specifications of the building* 2.3.5.5 Material emission*

EMISSION LIMIT (µm2)

Benzene Trichloroethylene (trichloroethylene) di-2- ethylhexylphthalate (DEHP) Dibutyl phthalate (DBP)	1 (for each substance)
Total VOCs (22)	1500
Formaldehyde	<60
Acetaldehyde	<300
Toluene	<450
Tetrachloroethylene	<350
Xylene	<300
1,2,4-Trimethylbenzene	<1500
1,4-dichlorobenzene	<90
Ethylbenzene	<1000
2-Butoxyethanol	<1500
Styrene	<350

2. HAZARDOUS SUBSTANCES

The manufacturer of paints and varnishes **must submit a** declaration of conformity of the legal representative, accompanied by the Safety Data Sheet (SDS) of the product. In the event of substances with such classifications not appearing in the SDS, the SDS itself is sufficient documentation to demonstrate compliance with the specific criterion.

2.4.1.3 Hazardous substances*

None of the following must be added intentionally to the components, parts or materials used:

- Cadmium, lead, chromium VI, mercury, arsenic and selenium additives in concentrations exceeding 0.010% by weight.
- Substances identified as "Substances of Very High Concern" (SVHCs) according to Article 59 of Regulation (EC) No 1907/2006 at a concentration greater than 0.10% w/w;
- Substances or mixtures classified or classifiable with the following hazard statements:
- as carcinogenic, mutagenic or toxic for reproduction in category 1A, 1B or 2 (H340, H350, H350i, H360, H360F, H360D, H360FD, H360Fd, H360Df, H341, H351, H361f, H361d, H361fd, H362);
- for acute oral, dermal, inhalation toxicity in category 1, 2 or 3 (H300, H301, H310, H311, H330, H331);
- as dangerous to the aquatic environment in category 1, 2 (H400, H410, H411);
- as having specific target organ toxicity category 1 and 2 (H370, H371, H372, H373).

3. POSSESSION OF THE ECOLABEL BRANDS OR EQUIVALENT

The manufacturer of Paints and Varnishes **must present documentation declaring possession of the Ecolabel or an equivalent label.** Alternatively, it may present a type III environmental declaration (i.e., an EPD - Environmental Product Declaration).

2.4 Technical specifications of building components* 2.4.2 Specific criteria for building components* 2.4.2.11 Paints and varnishes*

Paint products must comply with the ecological and performance criteria of Decision 2014/312/EU2 as amended, on the awarding of the EU Ecolabel for paint products. Verification: the designer shall prescribe that in the procurement phase the contractor shall ensure compliance with the criterion by using products bearing either:

- the EU Ecolabel or equivalent;
- a Type III environmental declaration in accordance with EN 15804 and ISO 14025 demonstrating compliance with this criterion. This can be verified if the environmental declaration contains the specific information related to the criteria contained in the above-mentioned decisions. Evidence of compliance with this criterion must be submitted to the contracting authority during the execution of the works, in the manner specified in the relevant specifications.

* NB: for more details and insights please refer to the text of the MEC of 20 May 2017. The current reference text is the Decree of 11 October 2017, "Minimum Environmental Criteria for the contracting of design services and works for the new construction, renovation and maintenance of public buildings" ("Building MEC") which amends the previous MEC, published in January 2017.
