Description of the organization:

Pinturas Macy is a company specialized in the manufacture of paints of the highest quality, which was established in 1978. We have been combining passion, effort, commitment and a constant search for excellence for more than 40 years. Factors that make us a solid benchmark company in the paint sector.

A family business, led by the second generation, with the DNA and means of a multinational company. Our marked family character allows us to offer our clients a close and personalized treatment, adapting and satisfying their needs with total flexibility.

We combine tradition and avant-garde. We have the most advanced technology in the paint sector to create innovative solutions, according to market trends and with a philosophy based on sustainability.

During these years, Pinturas Macy has been able to adapt to a constantly evolving market, which has allowed us to be who we are and to be present in Europe, Africa and South America, following an internationalization process in which we continue to work.

Facilities

The current facilities of **Pinturas Macy** are located on an area of 120,000 square meters, which include the departments of production, logistics and a total of **three laboratories, administration, training center and showroom.**

We have three well-differentiated laboratories: Tintometry, water-based products and solvent-based products.

We produce an average of 250 tons of finished product daily.

We have our own logistics platform, made up of a large fleet of trucks and agreements with the leading national and international transport companies. Thus, we guarantee a correct flow of goods that allows us to supply all our products without incident.

We always guarantee a **real stock** of all the references that make up our product catalog.

Environmental responsibility

As a chemical industry, our activity is not exempt from environmental risks, so it is a priority for **Pinturas Macy** to continuously minimize the impact of our processes on the natural environment.

- We integrate sustainable development criteria in all areas of activity of the company.
- We make a rational use of natural resources, raw materials and energy.
- We manage the minimization of waste.
- We guarantee compliance with European regulations and Spanish legislation in all of our products and in our production processes.
- We have a water treatment plant.

Periodically, we carry out audits of the implemented quality and management system.

We guarantee that our production and logistics processes have all the necessary measures to avoid any risk of contamination.

4

Pinturas Macy is certified with the UNE-EN ISO 9001: 2015 and UNE-EN ISO 14001 environmental management standards. Our goal is to limit VOC emissions in order to prevent and reduce air pollution.

I+D+i

Pinturas Macy maintains a strong commitment to research, development and innovation as the engine of our present and future strategy.

Since our inception, we have followed a model of permanent research and innovation, which has allowed us to position ourselves as a benchmark in the painting sector, both nationally and internationally.

We have a human team dedicated exclusively to researching innovative solutions. An added value to offer our customers products of the highest quality at a competitive cost.

Our I+D+i strategy is based on compliance with the following basic principles:

- Involvement of all company departments in the culture of innovation, promoting the incorporation of the latest technological advances in production processes and in all the activities we carry out.
- Constant modernization of equipment and technical production systems.
- Continuous improvement of human resources training.
- Maintenance and review of the Management System implemented, based on the **UNE-EN ISO 9001:2015, UNE-EN ISO 14001:2015** and **UNE 166002:2014**.

Thanks to our work, the Ministry of Science, Innovation and Universities has recognized **Pinturas Macy** as an **Innovative PYME**. A certification that certifies the effort made by the company in I+D+i in recent years.

Product description

Product name:

This EPD covers all the product's references included within the varnishes family.

- GROUP 1: BARNIZ TINTE POLIURETANO AL AGUA
- GROUP 2: BARNIZ URETANADO
- GROUP 3: MACYDECOR LASUR
- GROUP 4: BARNIZ BRILLO MARINO
- GROUP 5: BARNIZ TINTE
- GROUP 6: BARNIZ INTEMPERIE
- GROUP 7: LASUR AL AGUA

Product identification:

Macy Paints is a solid manufacturer and distributor in the market of decorative paints both indoors and outdoors, which tries to improve people's lives through painting and colour.

We are very aware of the demands of the market, which is why all decorative products for interiors offer professional painters high performance and an excellent combination of quality and product performance; they are also characterized by their extraordinary opacity and great whiteness.

The wide variety of benefits offered by the varnish family makes our customers satisfy their needs in our range of products, where we find water-based or solvent-based products, film-forming and non-film-forming, open or closed pore, with resistance to abrasion, etc.

Some of the products presented have antimicrobial active ingredients of natural origin that inhibit and prevent the growth of bacteria both on the support and on the paint film, allowing greater protection and longevity of the wood.

In this family we find varnishes tested under the ISO 16000 standard on indoor air quality, also counting on the classification regulations based on fire behavior (UNE-EN 13501-1: 2007) in some of them.

Product description:

This report covers all the MACY PAINTS Varnishes ranges listed. The following is a brief description of the **Barniz Tinte Poliuretano al Agua**, as well as its main characteristics:

The Barniz Tinte Poliuretano al Agua is a one-component varnish formulated with water-based acrylic and polyurethane emulsions. Especially recommended for any type of wood, both new and previously varnished, to stain, varnish, ennoble, restore and beautify all kinds of interior and exterior wooden constructions such as doors, cabinets, crafts, etc.

The product has a high chemical and mechanical resistance, with excellent abrasion resistance. It is a washable and waterproof product of quick drying that contains ultraviolet filters, and that is available in glossy and satin finish, with a letter of 10 different colors.

Below is a table with the main technical characteristics of the reference:

Parameter	Value
Denisity	1,000 - 1,030 kg/L (UNE EN ISO 2811), depending on color
Performance	10 - 16 m ² /L and layer (depending on wood conditions)
Nature	Acrylic and Polyurethane
Finishing	Shine and Satin
Viscosity	70 - 80 KU (UNE 48076)
Washability	Class 1 (EN 13300)
Thinner	Water
Dilution	0 - 10 % according to application method
Drying time	30 - 60 minutes at 20 °C
Repainting time	4 - 6 hours at 20 °C
Flash point	Not flammable
VOCs content (according to 2004/42/CE)	49,5 g/L (maximum 130 g/L, theoretical content)
Painting methods	Brush, roller or spray guns

Description of the production process:

The production process begins with the reception of the materials, coming from the different suppliers that arrive both on pallets and in containers. These are unloaded in the facilities in a first initial phase, since in a second phase a quality control of them is carried out. Once the quality stage of raw materials has been passed, they are stored for later use in manufacturing.

With the internal need to supply our references to customers, the production process begins, which may consist of proceeding to manufacture a given product using raw materials in different stages of dispersion and mixing. While the paint rests, quality control is carried out in the laboratory to verify that everything is correct. Once the laboratory control passes positively, the finished product is ready to be packaged in plastic bottles and stored on pallets for later distribution to the market. For this entire production process, water extracted from its own well and electricity have been needed, as well as gas for the operation of transport machines.

UN CPC code: 3511 Paints and varnishes and related products.

LCA information

Functional unit: kg of product to paint one m2 of wall, ranging from, from 0,122 kg/m2 to 0,214 kg/m2 depending on the paint reference. Specifically, Barniz Tinte Poliuretano al Agua is 0,206 kg/m2.

Reference service life: 5 years.

Time representativeness: data from factory (primary data) is from 2019. The products are manufactured in the manufacturing plants in Spain. The amount used of raw materials as well as energy consumption, waste production, pollutant emissions and transport distance (in A2 and A4) have been obtained from the manufacturing plants (primary data). Primary data has been obtained through a production of product over the total production of the company in Spain in 2019.

Database(s) and LCA software used: generic data on the impact per unit of matter or energy have been taken to determine emissions per kg of matter, kWh of energy or km transported. These data have been obtained from the Ecoinvent database version 3.6. (Updated in 6 month) and Simapro 9.3.0.3. The impact models used are those indicated in UNE-EN 15804:2012+A2:2019.

Description of system boundaries:

From cradle to grave or "Cradle to grave and module D". The EPD covers modules A1-A3, A4-A5, B1-B7, C1 – C4 and D.

System diagram:

More information: www.pinturas-macy.com

- Technical support for the implementation of the EPD: Marcel Gómez Consultoría Ambiental.
- The modularity principle, as well as the polluter-payer principle have been followed.
- Cut off rules: According to UNE-EN 15804 a minimum of 95% of total inflows (mass and energy) per module are included and more than 99% of the inflows are accounted for.
- Diesel consumption of internal factory forklifts has been excluded as it is less than 1% of the total and 5% per module.
- Allocation procedure: where necessary (energy, waste generation) an allocation based in mass has been used.
- The scenarios included are currently in use and are representative for one of the most probable alternatives.
- The quality of the input data has been evaluated according to its technological, temporal and geographical coverage. The representativeness of the selected processes is considered to be good, resulting in a value of 4,022 out of 5.
- The next processes have not been included since its impact is not significant:
 - Environmental impact from infrastructure, construction, production equipment, and tools that are not directly consumed in the production process.
 - Personnel-related impacts, such as transportation to and from work.
 - Long term emissions.

Variation - sites	One production site					-	-	-	-	-	-	-	-	-	-	-	-

*Inside the family, there are references with a difference larger than a 10% in terms of environmental impact. The results presented on this EPD are groupings of references which have a lesser difference than a 10%, being representative the results for the references within these groups.

■ A1-A3 Product stage

- **A1 Raw materials supply:** this module takes into account the extraction and processing of raw materials and the production of energy which is consumed at the manufacturing plant.
- **A2 Transport:** this module includes the transport of the different raw materials from the manufacturer to the factory.
- **A3 Manufacturing:** this module includes the consumption of energy during the manufacturing process and production of packaging material used for the further distribution. Moreover transport and management of the factory-produced waste are considered.

The electricity mix used corresponds to the Iberdrola Clientes mix for the year 2019. The emissions associated with the production of electricity are 0,231 kg of CO₂/kWh.

▪ A4-A5 Construction process stage

○ A4 Transport

Transport of the product, from the production plant to the installation site. An average distance of 374,15 km by road has been considered.

PARAMETER	VALUE/DESCRIPTION
Fuel type and consumption of vehicle or vehicle type used for transport e.g. long distance truck, boat, etc	Truck of 16 - 32 tn. Fuel consumption: 25 L/100 Km
Distance	Truck: 374,15 km Ship: 0 km
Capacity utilisation (including empty returns)	100%
Bulk density of transported products*	1,000 – 1,030 kg/L (Barniz Tinte Poliuretano al Agua)
Volume capacity utilisation factor	1

www.pinturas-macy.com - macy@pinturas-macy.com

11

○ **A5 Construction/Installation**

The product is directly transferred from the truck to the installation site, where manual operations are performed to install the analyzed product.

PARAMETER	VALUE / DESCRIPTION	
Auxiliary materials for installation	Brush or roller	Spray gun
Use of thinner	0 - 15 ml	0 - 15 ml
Use of other resources	No other resource consumption.	
Quantitative description of the type of energy (regional mix) and the consumption during the installation process	Not used.	0,015 - 0,029 kWh
Wastage of materials on the building site before waste processing, generated by the product's installation (specified by type)	Product losses (2%)	
Direct emissions to air, water and soil	None	
Outgoing materials (specified by type and treatment)	Product losses are 100% landfilled while packaging materials are 100% sent to a waste manager for their recycling.	

- **B Use stage:** Use phase (B1), and require maintenance (B2), repair (B3), replacement (B4), refurbishment (B5), operational energy use (B6) or operational water use (B7) during its Reference Service Life.
- **C End of life stage**
 - **C1 Deconstruction/demolition:** The product is dismantled and landfilled. It's assumed to be dismantled alongside the building or the surface, thus its considered negligible.
 - **C2 Transport to waste processing:** the model use for the transportation (see A4, transportation to the building site) is applied with a distance of 50 km.
 - **C3 Waste processing for reuse, recovery and/or recycling:** the product is 0% recycled.
 - **C4 Disposal:** The product is 100% landfilled.

PARAMETER	VALUE/DESCRIPTION
C1 Deconstruction/Collection process specified by type	100% Landfilled
C2 Transport Assumptions for scenario development	16 - 32 tn truck. Fuel consumption: 25 l/100 Km Distance: 50 km
C3 Waste processing Recovery system specified by type, Recovery system specified by type	REUSE - 0 kg RECYCLE - 0kg ENERGY RECOVERY - 0 kg
C4 Disposal Characteristic performance, Disposal specified by type	0,122 kg/m2 – 0,214 kg/m2 sent to landfill

▪ D Resource recovery stage

Although module D has been calculated, there are no recycling benefits since all the product is disposed of in a landfill as a mixture of construction products. 100% of the weight is sent to landfill.

Content information

This EPD® covers all the MACY Varnishes ranges listed.

Product component	Weight, Kg	Post-Consumer weight %	Renewable material, weight-%
Water	0 – 0,30	0	0
Copolymer	0 – 0,83	0	0
Fatty acids	0 – 0,077	0	0
Others	0 – 0,20	0	0
Total	1	0	0
Packaging materials	Weight/kg	Weight-% (versus the product) for 1 kg	
Packaging film	0,0007	0,07%	0
Polypropylene	0,0500	5,00%	0
Pallet	0,0074	0,74%	0
TOTAL	0,0583	5,83%	0

During the life cycle of the product any hazardous substance listed in the “Candidate List of Substances of Very High Concern (SVHC) for authorization” has not been used in a percentage higher than 0,1% of the weight of the product.

Environmental Information

The following environmental impact results are grouped considering the references that have a difference lesser than a 10% in terms of environmental impact over the life cycle for GWP. The results presented for each group of products correspond specifically to the average value of each group. The highlighted reference in the group title represents the mean value results for each group.

LCIA results are relative expressions and do not predict impacts on category endpoints, the exceeding of thresholds, safety margins or risk.

⁴ The indicator includes all greenhouse gases included in GWP-total but excludes biogenic carbon dioxide uptake and emissions and biogenic carbon stored in the product. This indicator is thus equal to the GWP indicator originally defined in EN 15804:2012+A1:2013.

⁵ The indicator includes all greenhouse gases included in GWP-total but excludes biogenic carbon dioxide uptake and emissions and biogenic carbon stored in the product. This indicator is thus equal to the GWP indicator originally defined in EN 15804:2012+A1:2013.

LCA Interpretation

As we can see in from the graph, the product stage (A1-A3) is the life cycle stage with the greatest impact for all the impact categories analyzed, representing between 98,91% (Eutrophication - freshwater (EP-freshwater) and 93,29% (Ozone layer depletion) of the total impact of the product life cycle.

The A4 represents an intermediate impact for all the impact categories analyzed. Transport (A4) represents between 4,05% (ozone layer depletion) and 0,37% (Eutrophication - freshwater (EP-freshwater) of the total life cycle impact. In relation to A5 and End of life stages (C2-C4) also the impact is less than 2%.
