

CLIMATE DECLARATION

FOR TOOL Steel

Declared unit: 1 tonne of Tool Steel

The climate declaration shows the emissions of greenhouse gases, expressed as CO₂-equivalents. It is based on verified results from a life cycle assessment (LCA) performed as basis for an EPD®, in accordance with ISO 14025.

Information about the product

OZKAN uses direct melting of scrap to produce tool steel. Alloying elements are added in the form of ferroalloys or metals. The production process route is Electric arc furnace -> Ladle furnace -> Vacuum degassing -> Continuous casting -> Hot rolling.

Hot rolled tool steels are being produced in various shapes such as Wide Flat Bars.

Tool steels is used for various application such as plastic injection mold etc.

Climate Declaration

The table below shows the emissions of greenhouse gases, calculated as carbon dioxide equivalents (kg CO₂ eq.) for 1 tonne of bearing steel. The included life cycle stages are upstream (A1-A2), core process (A3), downstream (A4/C1-C4) and benefits and loads (D).

Upstream (A1-A2)	Core (A3)	Downstream (A4, C1-C4)	Other (D)
358 kg CO ₂ eq.	640 kg CO ₂ eq.	221 kg CO ₂ eq.	-64.2 kg CO ₂ eq.

Other environmental information

This declaration is limited to the impact on climate change by emissions of greenhouse gases. Further information about other relevant environmental aspects is available in the EPD® at www.environdec.com and www.epdturkey.org.

Information about the company

Özkan Steel was founded in 1953 and has its headquarter and production sites in İzmir-Aliağa over an area of 460,000 m². Özkan Steel, having a melting capacity of 1,000,000 tons and rolling capacity of 700,000 tons per year, has been active in producing special steel profiles for the Shipbuilding, Offshore, Onshore, Automotive, Mining and Tunneling, Railways, Agriculture, Earth Moving, Material Handling, Machinery, Energy and Commercial Construction sectors. Özkan Steel has been using its over 60 years of experience in hot rolling of special profiles to increase its product portfolio continuously. This accumulated experience grants Özkan Steel the ability to be one of the leading steel companies in the production of special steel grades and special steel profiles throughout the world.
