EPDs within the same product category but from different programmes may not be comparable.

Product category rules (PCR): Finished bovine leather, 2011:03, version 3.0, UN CPC 2912

PCR review was conducted by: The Technical Committee of the International EPD® System; Chair of the PCR review: Maurizio Fieschi, info@environdec.com

Independent third-party verification of the declaration and data, according to ISO 14025:2006:

- EPD process certification
- EPD verification

Third party verifier: SGS Itala Spa, via Caldera 21 – 20153 Milano

In case of accredited certification bodies:

Accredited by: Accredia n.006H

Procedure for follow-up of data during EPD validity involves third party verifier:

- Yes
- No

The EPD owner has the sole ownership, liability, and responsibility for the EPD. EPDs within the same product category but from different programmes may not be comparable.

Description of the organisation

From its origins in 1950 as a small family-run tannery, Dani is now an international company with global positioning. We can rely on:

- 1,200 Employees
- 170M Euros in international revenues
- 3 Full cycle tanneries and headquarters in Italy
- 3 Operations plants for cutting & sewing
- 2 Sales facilities in the USA and China
- 2 Instant Service stocks in Italy and the USA

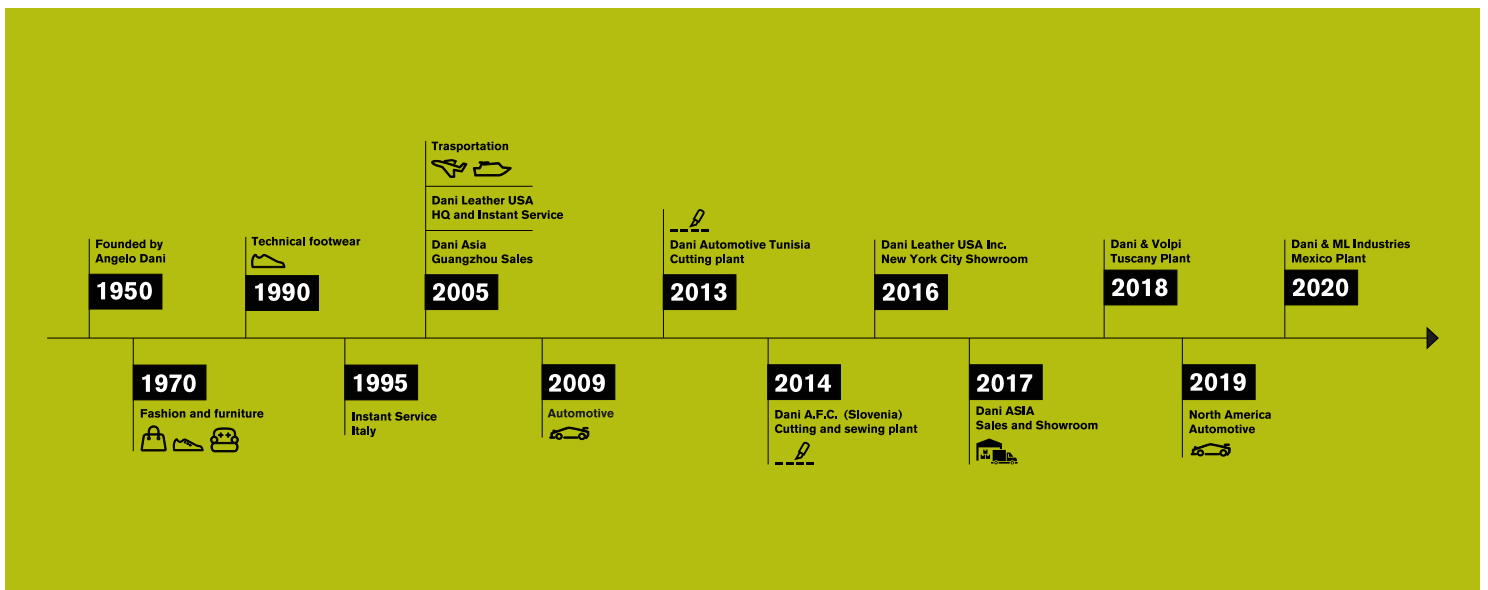

Our leather is used to put into practice bold ideas of stylists and designers, enhancing interiors of highclass cars, adding comfort and visual appeal to the most exclusive interiors. Leather is the result of industrial organisation, artisan skill, passion and creativity. Every day we act following our sustainable business model in which social and territorial inclusion, preservation of natural resources and profitability of investments coexist and sustain one another.

A commitment that is clearly stated in our logo: "Sustainable leather".

We constantly keep in touch with our customers and suppliers, workers and their families, public institutions and local communities, research authorities and universities. Our desire is to understand how the world in which we live evolves and preserve it.

We open our doors to listen to people, understand needs and put forward innovative suggestions together, promoting the virtuous circle that has made Dani into one of the leading companies in the world.

This EPD study concerns the three factories of the automotive products division, located in Arzignano at: via della Concia, 176 - via della Concia, 186 - via Quinta strada, 20. Dani leather is the result of a long production cycle carried out entirely in Arzignano.

Certifications

We invest in certifications as a communication tool of our daily commitment to improve the safety at workplace, the quality of our products, the reliability of our processes and the environmental impact of our processes. They show the implementation of advanced organisational models and the desire to improve their effectiveness and efficiency.

DANI S.p.A. has obtained the following certificates:

QUALITY SYSTEM
ISO 9001

QUALITY SYSTEM
IATF 16949

SAFETY SYSTEM
ISO 45001

ENVIRONMENTAL SYSTEM
ISO 14001

INFORMATION SECURITY SYSTEM
ISO/IEC 27001

ENVIRONMENTAL PRODUCT DECLARATION
Following the LCA (Life cycle assessment) study, the following impact categories are examined: greenhouse effect, ozone depletion, acidification, photochemical smog and eutrophication.
www.environdec.com
Certificate authority: SGS

DER BALUE ENGEL (RAL UZ 148)
This sets a series of parameters which are lower than those provided for by law, with regard to emissions of substances contained in leather for furnishings.
Certificate authority: RAL

LEATHER FROM ITALY FULL CYCLE (UNI EN 16484:2015)
This certifies that all production processes take place in Italy.
Certificate authority: ICEC

LEATHER WORKING GROUP (LWG)
is a multi stakeholder group aimed to develop and maintain a protocol that assesses the compliance and environmental performance of tanneries and promotes appropriate environmental commercial practices within the leather sector.

Name and location of production site

The item Vienna was produced in the DANI SpA plants located in Arzignano (VI).

PRODUCT INFORMATION

Product name

Vienna

Product identification

The product is identified as “Other leather, of bovine or equine animals, furless-CPC 2912”, according to CPC (Central Product Classification).

Product description

The product covered by this declaration is “finished cowhide”, intended as a finished product by the tanning industry, ready to be used as a semi-processed input for the next transformation phases by the various manufacturing industries. The hide can be used as a semiprocessed product for various finished products, such as furniture, clothing, footwear, etc. As the use of “finished cowhide” varies considerably in the final consumer products, no specific product function is defined.

This declaration is based on the production of the analysed article (soul Vienna) in the tannery in the reference period (2019) and the result therefore refers to a specific category of manufactured leather. A raw hide could be considered a waste product from the slaughterhouse, and the tanning processes could be considered as a waste recovery process. In compliance with the conservative approach that is requested by the PCR relative to this declaration, the raw hide is considered as a co-product of cattle breeding, and therefore has an environmental impact relative to that phase as well.

UN CPC code

“Other leather, of bovine or equine animals, furless- CPC 2912.

Geographical scope

Global

LCA INFORMATION

Declared unit

The declared unit is the production of 1 m2 of “finished bovine leather”, measured according to ISO standard 11646.

The declared unit is represented by 1 m2 of finished bovine leather, produced from fresh raw bull hide wet-white tanned.

Time representativeness

2019

Database(s) and LCA software used

AgriFootprint 4.0, Ecoinvent 3.5, SimaPro

Downstream

Description of system boundaries

Cradle-to-grave

Excluded lifecycle stages

- Transportation of the finished leather to the customer
- Use phase
- End-of-life of the finished product

Contribution of generic data

With regard to the contribution of generic quality data to overall impacts, the following approach was used: generic data (not selected) is considered as data used for the packaging disposal scenario, chemicals with generic quality data used to manufacture soul Vienna. The contribution of generic data (not selected) is in any case below the 10% threshold permitted by the PCR, for all impact categories.

ADDITIONAL INFORMATION

- ✓ The average thickness is 1.20 - 1.50 mm, according to the measured finished product produced in the reference period.
- ✓ The finished bovine leather is of the following type: “full grain leather”;
- ✓ The finished bovine leather analysed belongs to the following category: “pigmented leather”.

DIFFERENCES FROM PREVIOUS EPD VERSIONS

Some values of potential environmental impacts and use of resources have been updated with respect to previous published EPD, due to a calculation error.
The owner of the EPD has been updated.

Please note that EPDs developed for the same category of product but following different programs may not be comparable.
